airWallet

User-friendly payment system for your laundry

Airwallet app

What is Airwallet?

Airwallet is the modern and user-friendly payment system tailor-made for your laundry machines. We install a small device inside every machine that communicates with the users' Airwallet app or the wall-mounted payment terminal 'Anton'.

Laundry made easy

Airwallet is designed with user-friendliness in mind, so it is intuitive for everyone to use. The users get easy payment and booking in the laundry, while you get an overview and transparency of your laundry's performance.

Administration free

Don't waste your time on bookkeeping, collecting coins, replacing washing cards, or users requesting refunds. Everything is administration free in the Airwallet.

Easy payments

Users avoid acquiring coins, tokens, or remembering laundry cards. Users simply pay with the Airwallet app, or by contactless payment on Anton.

Safety and stability

Airwallet is used by people from the entire world. Anyone who needs assistance can call, e-mail, or chat with the Airwallet support team for free.
